

## **Letter of Recommendation**

To whom it may concern:

I am writing to give my full and enthusiastic recommendation of Anton Grachev. I am one of Anton's supervisors at UC Santa Cruz where he serves as an Instructional Spaces and Technology Support Technician. Since starting his position, Anton has demonstrated tremendous drive and technical acuity. In his role, he is tasked with care, maintenance, and testing of instructional technology hardware. On any given day, this could include a range of tasks like confirming that various devices (like video switchers and media system controllers) are passing signal and in communication with the network, troubleshooting by tracing signal flow and identifying points in the chain that are causing unexpected problems and resolving them accordingly, and detailed cleaning of a wide range of hardware.

Since hiring Anton, we have been impressed with how quickly and naturally he took to his work. His technical understanding is intuitive; he has an inherent understanding of how things work. His ability to quickly adapt, absorb new information, and apply his knowledge effectively makes him an invaluable asset to our department and a strong candidate for advanced study.

I have no doubt that Anton will bring the same level of dedication, problem-solving ability, and intellectual curiosity to his studies that he has consistently demonstrated in his work. I wholeheartedly recommend him for your program and am confident that he will excel in any academic environment that challenges and nurtures his talents.

Sincerely,  
Anthony Garcia (he/him)
